lpearsonsmith "PR sample" I need my sleep. If I don't get my sleep, I am not a happy lady. I'm in love with the new @sleepmastereu mask that provides total light elimination and in-built sound muffling. It's padded so it's so comfortable to wear. I can't wait to use it for traveling, as it really does make you feel that you're in your own little world 💙

Sleep Master Revolutionary Sleep Mask*** - £19.95, [Sleep Master](#)

This is honestly the best face mask I've ever tried, and I can't wait to take it on a long-haul flight in a few months. It's silk, so gentle on the skin, and it offers total light elimination. It's also padded, which is great for travel, and these pads have in-built sound muffling to block out the environment around you and leave you in your own little world to doze off. This is a hypoallergenic mask and you can only wash it by hand. It has a velcro fastening at the back, so can adjust to all heads and allows you to get that personalised tight fit to block out light and sound.
